

*Interested in learning more about  
Progressive Education?*

Join us for a Book Study of  
***Loving Learning: How Progressive Education Can Save America's  
Schools***

Mondays, October 2, 16, and 30  
in the High Meadows School Library

*“This is the book we’ve all been waiting for: a vision of what schools can do to guide children to become happy and engaged learners, productive and creative workers, and active, caring citizens.”*

Dr. Madeline Levine

What is progressive education? What makes progressive learning environments different from traditional educational environments? If you have ever asked yourself these questions, then the *Center for Progressive Learning* has the perfect opportunity for you! Please join us for an adult book study to learn more.

Written by the former head of Park Day School, Tom Little, the book demonstrates the values found in a progressive approach by weaving historical, philosophical and practical stories and examples of whole-child learning. Experience how educators and schools around the nation invigorate learning and promote inquiry by allowing curriculum to develop from children’s innate curiosity and desire to learn.
