

Using Technology to Connect Children to the Natural World

We invite you to join us for single-day workshop on
Friday, February 10 from 9:00 a.m. to 12:00 p.m.

High Meadows School Campus and EfS Classroom

There is a belief that we must choose between technology and nature. At best these two important parts of our children's world are viewed as mutually exclusive, at worst they are seen to be in competition with one another. Please join Education for Sustainability Teacher Michelle Griffin to explore ways we can utilize technology to connect with nature. The workshop will highlight ways to get your child outdoors using a variety of resources:

- Discover and use apps your child can use to explore the outdoors.
- Wonder and experiment with device-friendly tools.
- Share and learn ways other parents are managing screen time.

“We need a new way of thinking, one that tightly links the human-made world of economics and politics with the natural world of climate and biodiversity and with the designed world of 21st century technology.”

- Jeffrey Sachs, American economist and director of The Earth Institute at Columbia University

This single-day workshop is designed for parents. Price: \$65
